<b>Introduction .....</b>	<b>iii</b>
---------------------------	------------

### Sections

<b>1      National health care and Medicare spending .....</b>	<b>1</b>
----------------------------------------------------------------	----------

1-1    Medicare made up about one-fifth of spending on personal health care in 2004 .....	3
1-2    Medicare's share of total spending varies by type of service, 2004 .....	4
1-3    Health care spending has grown more rapidly than GDP, with public financing making up nearly half of all funding.....	5
1-4    Trustees project Medicare spending to increase as a share of GDP .....	6
1-5    Changes in spending per enrollee, Medicare and private health insurance .....	7
1-6    Trustees and CBO project Medicare spending to grow at an annual average rate of 7 percent to 8 percent over the next 10 years.....	8
1-7    Medicare spending is concentrated in certain services and has shifted over time .....	9
1-8    FFS program spending is highly concentrated in a small group of beneficiaries, 2002 .....	10
1-9    Medicare HI trust fund is projected to be insolvent in 2018.....	11
1-10    Medicare faces serious challenges with long-term financing .....	12
1-11    Average monthly SMI benefits, premiums, and cost sharing are projected to grow faster than the average monthly Social Security benefit.....	13
1-12    Medicare FFS providers: Number and spending .....	14
Web links .....	15

<b>2      Medicare beneficiary demographics.....</b>	<b>17</b>
------------------------------------------------------	-----------

2-1    Aged beneficiaries account for the greatest share of the Medicare population and program spending, 2003 .....	19
2-2    Medicare spending rises as beneficiaries age, 2003 .....	20
2-3    Beneficiaries who report being in poor health account for a disproportionate share of Medicare spending, 2003 .....	21
2-4    Enrollment in the Medicare program is projected to grow fastest in the next 30 years .....	22
2-5    Characteristics of the Medicare population, 2003 .....	23
2-6    Characteristics of the Medicare population, by rural and urban residence, 2003 .....	24
2-7    Arthritis and hypertension are the most common diseases reported by Medicare beneficiaries, 2002 .....	25

Web links .....	26
-----------------	----

<b>3      Dual-eligible beneficiaries.....</b>	<b>27</b>
------------------------------------------------	-----------

3-1    Dual-eligible beneficiaries account for a disproportionate share of Medicare spending, 2003 ....	<b>29</b>
3-2    Dual eligibles are more likely than nondual eligibles to be disabled or over 85 years old, 2003.	<b>30</b>
3-3    Dual eligibles are more likely than nondual eligibles to report poorer health status, 2003 .....	<b>31</b>
3-4    Demographic differences between dual eligibles and nondual eligibles, 2003 .....	<b>32</b>
3-5    Differences in spending and service use between dual eligibles and nondual eligibles, 2003 .....	<b>33</b>

3-6	Both Medicare and total spending are concentrated among dual-eligible beneficiaries, 2003 .....	<b>34</b>
3-7	Dual-eligible beneficiaries report generally good access to care.....	<b>35</b>
	Web links .....	<b>36</b>
<b>4</b>	<b>Quality of care in the Medicare program.....</b>	<b>37</b>
4-1	Hospital mortality decreased from 2000 to 2004.....	<b>39</b>
4-2	Hospital processes of care improving, but many rates still low, 2001–2004.....	<b>40</b>
4-3	Safety of care: Adverse events affect many hospitalized beneficiaries, 2000–2004 .....	<b>41</b>
4-4	Rates of potentially avoidable admissions, 2002–2004.....	<b>42</b>
4-5	Most ambulatory care indicators show improvement or stability, 2002–2004.....	<b>43</b>
4-6	Patient-centeredness of care: Beneficiaries rate interactions with health care providers highly ..	<b>44</b>
4-7	Share of home health patients achieving positive outcomes continues to increase .....	<b>45</b>
4-8	The quality of dialysis care has generally improved.....	<b>46</b>
4-9	Changes in safety of care for long-term care hospital patients, 2003–2004 .....	<b>47</b>
4-10	IRF patients' improvement in function has remained stable .....	<b>48</b>
4-11	Medicare Advantage plans improve, but rates are still low on some measures, 2001–2004.....	<b>49</b>
4-12	MA and FFS patient experience scores are similar.....	<b>50</b>
	Web links .....	<b>51</b>
<b>5</b>	<b>Access to care in the Medicare program .....</b>	<b>53</b>
5-1	Beneficiaries' reports of difficulties obtaining care, 1994–2004.....	<b>55</b>
5-2	Fewer aged beneficiaries delayed or failed to obtain care due to cost, compared with younger Americans .....	<b>56</b>
5-3	Access to physicians is similar for Medicare beneficiaries and privately insured people .....	<b>57</b>
5-4	Percent of physicians accepting new patients, by type of insurance, 2003–2004.....	<b>58</b>
5-5	Physician acceptance of new Medicare patients has stabilized .....	<b>59</b>
5-6	Most beneficiaries had little or no problem accessing home health and special therapy services .....	<b>60</b>
5-7	Ethnic and racial disparities in delaying or failing to obtain care, 2004.....	<b>61</b>
5-8	Beneficiaries differ in their reports of obtaining needed, urgent, or routine care, 2004 .....	<b>62</b>
	Web links .....	<b>63</b>
<b>6</b>	<b>Medicare beneficiary and other payer financial liability .....</b>	<b>65</b>
6-1	Sources of supplemental coverage among noninstitutionalized Medicare beneficiaries, 2003 ....	<b>67</b>
6-2	Sources of supplemental coverage among noninstitutionalized Medicare beneficiaries, by beneficiaries' characteristics, 2003 .....	<b>68</b>
6-3	Total spending on health care services for noninstitutionalized FFS Medicare beneficiaries, by source of payment, 2003 .....	<b>69</b>
6-4	Per capita total spending on health care services among noninstitutionalized FFS beneficiaries, by source of payment, 2003 .....	<b>70</b>
6-5	Variation in and composition of total spending among noninstitutionalized FFS beneficiaries by type of supplemental coverage, 2003 .....	<b>71</b>
6-6	Out-of-pocket spending for premiums and health services per beneficiary, by insurance and health status, 2003 .....	<b>72</b>
	Web links .....	<b>73</b>

**7 Acute inpatient services ..... 75**

**Short-term hospitals**

7-1	Growth in Medicare's payments for hospital inpatient and outpatient services continues, 1994–2004 .....	77
7-2	Diagnosis related groups with highest volume, fiscal year 2004.....	78
7-3	Number of acute care hospitals and Medicare discharges, by hospital group, 2004 .....	79
7-4	Cumulative change in total admissions and total outpatient visits, 1994–2004.....	80
7-5	Trends in Medicare and total hospital length of stay, 1994–2004 .....	81
7-6	Hospital occupancy rates, 1994–2004 .....	82
7-7	Cumulative change in Medicare inpatient days per beneficiary and discharges per beneficiary, 1994–2003 .....	83
7-8	Simulated Medicare inpatient payments, by component and hospital group, reflecting 2006 payment policy .....	84
7-9	Cumulative change in Medicare acute inpatient PPS payments and costs per case, and operating update, 1994–2004 .....	85
7-10	Medicare acute inpatient PPS margin, 1994–2004 .....	86
7-11	Medicare acute inpatient PPS margins, by urban and rural location, 1994–2004 .....	87
7-12	Medicare acute inpatient PPS margins, by teaching status, 1994–2004 .....	88
7-13	Overall Medicare margin, 1997–2004 .....	89
7-14	Overall Medicare margins, by urban and rural location, 1997–2004 .....	90
7-15	Overall Medicare margins, by teaching status, 1997–2004 .....	91
7-16	Hospital total margin, 1994–2004.....	92
7-17	Total hospital margin, by urban and rural location, 1994–2004 .....	93
7-18	Total hospital margin, by teaching status, 1994–2004.....	94
7-19	Hospitals with consistently negative overall Medicare margins tend to have above-average costs .....	95
7-20	Hospitals with consistently negative overall Medicare margins have a poor competitive position in their market areas .....	96
7-21	Relationship of acute inpatient PPS and overall Medicare margins, 2004 .....	97
7-22	Relationship of overall Medicare and total margins, 2004 .....	98
7-23	Consistently high-cost hospitals have Medicare margins that are far below average.....	99
7-24	Change in Medicare hospital inpatient costs per discharge and private payer payment-to-cost ratio, 1986–2004 .....	100
7-25	Markup of charges over costs for all patient care services, 1994–2004 .....	101
7-26	Number of critical access hospitals, 1999–2006.....	102
<b>Specialty psychiatric facilities</b>		
7-27	Medicare payments to inpatient psychiatric facilities, 1996–2005 .....	103
7-28	Inpatient psychiatric facilities, 1996–2005 .....	104
Web links .....		105

**8 Ambulatory care ..... 107**

**Physicians**

8-1	FFS Medicare spending and payment updates for physician services, 1996–2010 .....	109
8-2	Medicare spending per FFS beneficiary on physician services, 1995–2015 .....	110

8-3	Number of physicians billing Medicare is increasing steadily, 1999–2004 .....	<b>111</b>
8-4	Spending growth varies by type of service, 2004–2005 .....	<b>112</b>
8-5	Volume grew more rapidly in 2004 than in previous years .....	<b>113</b>
8-6	Medicare Economic Index input categories, weights, and projected price changes for 2007 ....	<b>114</b>
8-7	Quarterly changes in professional liability insurance premiums, 1993–2005 .....	<b>115</b>
8-8	Work GPCI before the MMA established a floor of 1.00.....	<b>116</b>
<b>Hospital outpatient services</b>		
8-9	Spending on all hospital outpatient services, 1995–2005 .....	<b>117</b>
8-10	Most hospitals provide outpatient services .....	<b>118</b>
8-11	Payments and volume of services under the Medicare hospital outpatient PPS, by type of service, 2004 .....	<b>119</b>
8-12	Hospital outpatient services with the highest Medicare expenditures, 2004 .....	<b>120</b>
8-13	Medicare coinsurance rates, by type of hospital outpatient service, 2004.....	<b>121</b>
8-14	Transitional corridor payments as a share of Medicare hospital outpatient payments, 2002–2004 .....	<b>122</b>
8-15	Medicare hospital outpatient, inpatient, and overall Medicare margins, 1998–2004 .....	<b>123</b>
<b>Ambulatory surgical centers</b>		
8-16	Number of Medicare-certified ASCs increased over 60 percent, 1999–2005 .....	<b>124</b>
<b>Imaging services</b>		
8-17	Medicare spending for imaging services, by type of service, 2004 .....	<b>125</b>
8-18	Radiologists received almost half of Medicare payments for imaging services, 2004 .....	<b>126</b>
Web links .....		
<b>9</b>	<b>Post-acute care</b> .....	<b>129</b>
9-1	The number of post-acute care providers generally continues to grow .....	<b>131</b>
9-2	Spending for post-acute care has risen in each setting, 1999–2005.....	<b>132</b>
<b>Skilled nursing facilities</b>		
9-3	Medicare spending for SNF services generally has increased but growth has moderated since the PPS was implemented.....	<b>133</b>
9-4	Medicare skilled nursing facility use increased between 1999 and 2003 .....	<b>134</b>
9-5	Characteristics of skilled nursing facilities, 2003 .....	<b>135</b>
9-6	Medicare costs per day in freestanding SNFs grew at an average annual rate of 3.7 percent between 2000 and 2004.....	<b>136</b>
9-7	Freestanding skilled nursing facility Medicare margin, by facility group, 2004 .....	<b>137</b>
9-8	The highest percentage of Medicare-covered freestanding SNF days were in “very high” and “high” rehabilitation RUG-III groups in 2004.....	<b>138</b>
<b>Home health agencies</b>		
9-9	Spending for home health care, 1992–2005.....	<b>139</b>
9-10	Medicare home health care use, 1992–2003 .....	<b>140</b>
9-11	The home health product changed after the prospective payment system started .....	<b>141</b>
9-12	Aggregate Medicare margins for all freestanding home health agencies remain in double digits, 2004.....	<b>142</b>

<b>Long-term care hospitals</b>		
9-13	The top 15 LTC–DRGs in 2004 made up almost two-thirds of LTCH discharges .....	<b>143</b>
9-14	The number of long-term care hospitals has grown rapidly since 1990 .....	<b>144</b>
9-15	Volume of cases and Medicare spending increased under the LTCH prospective payment system .....	<b>145</b>
9-16	Comparison of changes in LTCHs' Medicare payments and costs per case, 1999–2004 .....	<b>146</b>
9-17	Long-term care hospitals' PPS Medicare margin, by group, 2002–2004 .....	<b>147</b>
<b>Inpatient rehabilitation facilities</b>		
9-18	Distribution of most common types of cases in inpatient rehabilitation facilities, 2004 .....	<b>148</b>
9-19	The number of all types of inpatient rehabilitation facilities has grown.....	<b>149</b>
9-20	Volume of care and Medicare spending increased under the IRF prospective payment system .....	<b>150</b>
9-21	IRFs' Medicare payments have risen faster than their costs, post-PPS .....	<b>151</b>
9-22	Inpatient rehabilitation facilities' PPS Medicare margins, by group, 2002–2004 .....	<b>152</b>
Web links .....	<b>153</b>	
<b>10 Medicare Advantage.....</b>	<b>155</b>	
10-1	Counties with MA plans, 2006 .....	<b>157</b>
10-2	Enrollment in MA plans, 1994–2006.....	<b>158</b>
10-3	County benchmarks for MA plans, 2006 .....	<b>159</b>
10-4	Benefits available to beneficiaries in MA plans, by type of plan .....	<b>160</b>
10-5	MA Regions .....	<b>161</b>
10-6	Special needs plans have grown quickly.....	<b>162</b>
10-7	Number of organizations offering special needs plans, by county, 2006 .....	<b>163</b>
Web links .....	<b>164</b>	
<b>11 Drugs .....</b>	<b>165</b>	
11-1	Medicare spending and annual growth rates for Part B drugs .....	<b>167</b>
11-2	Top 10 drugs covered by Medicare Part B, by share of expenditures, 2004 .....	<b>168</b>
11-3	Part D enrollment and other sources of drug coverage in early 2006 .....	<b>169</b>
11-4	Characteristics of Medicare PDPs in 2006 .....	<b>170</b>
11-5	Distribution of PDP and MA–PD premiums for basic and enhanced plans in 2006 .....	<b>171</b>
11-6	PDPs offered in 2006 by organizations with at least one nationwide plan .....	<b>172</b>
11-7	“Near-national” organizations with 30 or more PDPs among the 34 regions.....	<b>174</b>
11-8	Premiums and cost-sharing requirements among PDPs in 2006 .....	<b>175</b>
11-9	Geographic distribution of PDPs in 2006 .....	<b>176</b>
11-10	Characteristics of MA–PDs' drug benefits in 2006 .....	<b>177</b>
11-11	Premiums and cost-sharing requirements among MA–PD drug benefits in 2006.....	<b>178</b>
11-12	Distribution of Part D enrollees by organization .....	<b>179</b>
11-13	Most Part D plans distinguish between preferred and nonpreferred brands and include specialty tiers .....	<b>180</b>
11-14	Part D plans typically list about 1,000 drugs: PDPs .....	<b>181</b>

11-15	Part D plans typically list about 1,000 drugs: MA-PDs.....	<b>182</b>
11-16	The share of drugs listed in a therapeutic category depends on category size and regulation....	<b>183</b>
11-17	Part D plans concentrate prior authorization in selected categories .....	<b>184</b>
	Web links .....	<b>185</b>
<b>12</b>	<b>Other services .....</b>	<b>187</b>
	<b>Dialysis</b>	
12-1	Total number of dialysis facilities is growing; for profit and freestanding are increasing over time .....	<b>189</b>
12-2	Medicare spending for outpatient dialysis services furnished by freestanding dialysis facilities, 1996 and 2004.....	<b>190</b>
12-3	Dialysis facilities' capacity increased steadily between 1995 and 2004.....	<b>191</b>
12-4	Characteristics of beneficiaries vary somewhat according to the dialysis facility's business status in 2001 and 2002 .....	<b>192</b>
12-5	The ESRD population is growing, and most ESRD patients undergo dialysis.....	<b>193</b>
12-6	Diabetics and the elderly are among the fastest growing segments of the ESRD population ...	<b>194</b>
12-7	Aggregate margins vary by type of freestanding dialysis facility, 2003.....	<b>195</b>
	<b>Hospice</b>	
12-8	Use of hospice among Medicare beneficiaries increased from 2000 to 2004.....	<b>196</b>
12-9	Long hospice stays are getting longer, but short stays persist .....	<b>197</b>
12-10	Average length of stay in hospice by state, 2004.....	<b>198</b>
12-11	Hospice use has grown for all Medicare decedents, but use remains higher among those in managed care.....	<b>199</b>
12-12	An increase in freestanding agencies fueled growth in the number of hospice providers, 2001–2005 .....	<b>200</b>
	<b>Clinical laboratory</b>	
12-13	Medicare spending for clinical laboratory services, in billions, FY 1994–2004 .....	<b>201</b>
12-14	Hospital and independent laboratories account for most ambulatory test volume .....	<b>202</b>
12-15	Highest volume laboratory tests, 2003.....	<b>203</b>
	<b>Outpatient therapy</b>	
12-16	Outpatient therapy is furnished by many different entities.....	<b>204</b>
12-17	Medicare spending on outpatient therapy services has almost doubled since 2000 .....	<b>205</b>
12-18	Outpatient therapy users and service have increased since 2000.....	<b>206</b>
12-19	Medicare spending on therapists in private practice grew faster than that for other providers, 2000–2004.....	<b>207</b>
12-20	Per user spending on outpatient therapy varied threefold across settings, 2004.....	<b>208</b>
12-21	Since 2000 the number of outpatient therapy users grew 8 percent a year.....	<b>209</b>
	Web links .....	<b>210</b>
